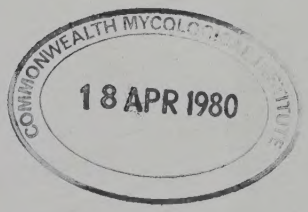
INDEX



VOLUME 25, PARTS 1 — 3, 1977

AUTHOR INDEX, VOLUME 25

The number of each Part is indicated in bold.

Chan, B.L. *see* Tan, A.S.
Cheong Sai Fah **1** 19; **2** 81
Chin, H.C. *see* Yip, Esah

Ghandimathi, H. *see* Yeang Hoong Yeet
Gomez, J.B. **3** 109
Gomez, J.B. and Tata, S.J. **3** 120

Lau, C.H. *see* Pushparajah, E.
Lim, C.L. *see* Tan, A.S.
Lim, T.M. **2** 93

Mahmud bin Hj. Abd. Wahab *see* Pushparajah, E.

Pakianathan, S.W. **1** 50
Paranjothy, K. *see* Yeang Hoong Yeet
Pusparajah, E., Mahmud bin Hj. Abd. Wahab and Lau, C.H. **3** 101

Shum, K.C. and Wren, W.G. **2** 69
Soong, N.K. *see* Yeoh, C.S.
Subramaniam, A. **2** 61

Tan, A.S., Lim, C.L. and Chan, B.L. **3** 127
Tata, S.J. *see* Gomez, J.B.

Wren, W.G. *see* Shum, K.C.

Yeang Hoong Yeet, Ghandhimathi, H. and Paranjothy, K. **1** 9
Yeoh, C.S. and Soong, N.K. **1** 1
Yip, Esah and Chin, H.C. **1** 31

SUBJECT INDEX, VOLUME 25

Titles of papers are given in italics.
The number of each Part is indicated in bold.

Aldehyde groups
Blanket Grade Crepe **2** 65
calibration of **2** 62, 63
effect of chemical treatment on **2** 64, 65
in deproteinised rubber **2** 64, 65
in different rubbers **2** 65
in synthetic polyisoprene **2** 64
method for estimation of **2** 61–68
SMR 20 **2** 65
SMR 50 **2** 65
Allopren 20 **1** 6
Aluminium **3** 101
Ammonia **2** 69
Ammonium sulphate **1** 2

B-serum **3** 120
Bacterial activity
effect on latex VFA **2** 69, 70
media for making plate counts **2** 71, 72
Bacterial counts
of factory bulk latex **2** 72, 73, 74
of field latex **2** 74
of high ammonia latex **2** 76, 77
of latex from collecting stations **2** 73
of latex from incoming tankers **2** 73
Baling temperature
effect of on block rubbers **1** 19–30
effect of on Mooney viscosity **1** 20
effect of on Mooney viscosity with hydroxylamine **2** 85
effect of on PRI **1** 21
effect of on production of SMR 5L **1** 25
effect of on SMR 5CV production **1** 30
effect of on storage hardening **1** 19–30
effect of on viscosity of Tyre Rubber **2** 83
effect of on Wallace Plasticity **1** 21
effect on Mooney viscosity of SMR 5CV **1** 27
effect on production of SMR 10 **1** 26
Bark
flocculating activity of **3** 109, 110, 111, 117, 118

Basidiospores
dispersal of **2** 97
germination of **2** 94
production of **2** 93
root disease infection by **2** 93

C-serum **3** 121
Calcium **1** 33–35, 38, 40, 41, 45
Caustic potash **2** 69
Christmas Island Rock Phosphate **3** 101
Clonal rubbers
content of aldehyde groups in **2** 65
Clones
BR 2 **1** 10
differences in protein electropherograms **1** 10–13
distribution of microhelices in *Hevea* **3** 120–126
FX 2784 **1** 13, 14
GT 1 **1** 10, 11, 12, 13, 17; **3** 111, 112
LCB 1320 **1** 11, 12
PB 86 **1** 10; **3** 111, 112
PR 107 **1** 10, 11, 12, 13, 14
RRIM 501 **3** 111, 112, 121, 122, 123, 125
RRIM 600 **1** 4, 7, 58, 59; **3** 111, 112, 121, 122, 123, 124, 125
RRIM 612 **1** 58, 59
Tjir 1 **1** 10, 11, 12, 17; **3** 111, 112, 121, 122, 123, 124
WR 101 **1** 11, 12, 13
Copper **3** 109
Crosslinking **3** 133
Cultivar differences in zymograms **1** 13–17
Cuplump degradation in sunlight **3** 130, 131

Degradation of rubber **3** 127
Demonstration of Latex Coagulants in Bark Extracts of Hevea *and Their Possible Role in Latex Flow* **3** 109
Dimedone **2** 61
Disease (*see* under specific names)
Dynamic properties
effect of sunlight on **3** 127–134

Effect of Baling Temperature on Storage of Crated Block Rubbers (SMR 5L, 10 and 5CV) **1** 19
Effect on the Dynamic Properties of Rubber Exposed to Sunlight **3** 127
Elongation at break **3** 127
Estimation of Aldehyde Groups in Natural Rubber with 2,4-dinitrophenylhydrazine **2** 61
Ethephon
diurnal changes effect on stimulation with **1** 51–53

effect on latex **1** 48
yield response to site application of **1** 54, 55, 56, 59
Ethrel (*see* Ethephon)

Fertilisers (*see* also under specific names)
effect of NR-based fertilisers on RRIM 600 **1** 4, 7
efficient use of **1** 1
evaluation of NR-based **1** 3
hygroscopicity of NR-based **1** 4, 6
mobility of phosphorous in soils **3** 104, 105
NR-based slow-release **1** 1–7
nutrient loss of **1** 1
nutrient release of NR-based **1** 4
phosphatic build-up **3** 101
prevention of leaching loss **1** 1
production of NR-encapsulated **1** 2
recovery of toluene from NR-based **1** 2
residual effects of phosphate on *P. phaseoloides* **3** 101–108
rock phosphate **3** 101
superphosphate **3** 101
Flocculating activity
of bark extracts **3** 110, 111, 112, 117
on surface of tapping cut **3** 113, 114, 115
Flocs
microscopic examination of **3** 112, 118
Formaldehyde **2** 81, 86
Frey Wyssling lutoids **3** 117
Further Studies on the Occurrence and Distribution of Microhelices in Clones of Hevea **3** 120

Ganoderma pseudoferreum (Wakej)
electron micrographs of **2** 98
fauna associated with **2** 94
germination of **2** 95
spore viability of **2** 95, 96

Hardness **3** 127
Heat build-up **3** 127, 128
Hevea cultivars
identification of **1** 9–17
Hydrochloric acid **2** 61
Hydroxylamine **2** 61, 83
Hydroxylamine neutral sulphate **1** 19
Hydroxylamine salts **2** 81

Immaturity period
build-up of phosphorous during **3** 101

Ion distribution
between phases of latex **1** 31–49
between sera of flow fractions **1** 32, 33
effect of yield stimulation on **1** 32
Iron **3** 101

Ketones **2** 61, 63
Kieserite **1** 1

Latex
assessing condition of **2** 69
bacterial counts in high ammonia **2** 76, 77, 78
bacterial counts of factory bulk **2** 72, 73, 74
bacterial counts of field latex **2** 74, 75
bacterial counts of latex in collecting stations **2** 73
bacterial counts of latex in tankers **2** 73
calcium presence **1** 33, 34, 35, 37, 38
cause for flow of **3** 109
coagulation of **3** 109, 115
deterioration of **2** 69
effectiveness of preservation in **2** 77
magnesium presence **1** 33, 34, 35, 36, 37, 38, 40, 42, 46
osmotic pressure measurement **1** 51
plugging of vessels of **3** 109, 115, 117, 118
potassium presence **1** 37, 38, 39, 40
presence of enzymes **1** 9
preservation of **2** 69
turgor pressure measurement **1** 51
use of for fertiliser encapsulation **1** 6, 7
vessels **3** 120
viscosity stabilisation of **2** 81
Latex flow
influence of tapping time on **1** 50, 51
Latex Flow Studies X. Distribution of Metallic Ions between Phases of Hevea *Latex and the Effects of Yield Stimulation on this Distribution* **1** 31
Latex fractions
preparation and analysis of **1** 32, 33
Latex particle destabilisation **1** 31
Latex plugging **1** 50
Latex vessel rings **1** 50
Latex yield
effect of calcium ions **1** 48
effect of magnesium ions **1** 48
Leaching
nutrient losses by **1** 3, 5, 6, 7
Limonia nervosa **2** 97
Limonia umbrata **2** 97

Lutoids
damage of **3** 120
Lysosomes **3** 120

Magnesium **1** 33–44, 46
Microfibrils **3** 120
Microhelices distribution **3** 120–126
Mooney viscosity
differences in Tyre Rubber **2** 84, 86
differences in viscosity stabilised rubbers **1** 27
effect of baling temperature and formaldehyde on **2** 87
effect of baling temperature and hydroxylamine on **2** 85, 86
effect of baling temperature on **1** 20, 27
of clonal rubbers **2** 65
of SMR 5L on storage **1** 21
of SMR 10 on storage **1** 22
Muriate of potash **1** 2

Natural Rubber-based Slow-release Fertilisers **1** 1
Natural rubber
effect of purification of **2** 64, 65
use of for fertiliser encapsulation **1** 1–7
Nitrogen **2** 62
Nutrients
leaching losses of **1** 5, 6, 7
release from NR-based **1** 4

Observations on Bacterial Activity in Natural Rubber Latex – Plate Counts of Latex Bacteria on a Supplemented Medium **2** 69
Osmotic pressure **1** 51
diurnal changes in **1** 53, 54, 55
Oxidation **2** 65

Parachloro meta-cresol **2** 77
Phellinus noxius **2** 99
Phosphate
movement down soil profile **3** 104, 105
Phosphatic fertilisers **3** 101
Phosphorous
fractions of in Malaysian soils **3** 101
uptake by *P. phaseoloides* **3** 105
Plasticity Retention Index **3** 134
effect of baling temperature on **1** 21
of SMR 5L on storage **1** 23
of SMR 10 on storage **1** 24
Plugging index **1** 50
Potassium **1** 37, 38, 39
Production, Germination and Dispersal of Basidiospores of Ganoderma pseudoferreum *on* Hevea **2** 93

Propylene glycol 1 2
Protein and Enzyme Variation in Some Hevea *Cultivars* 1 9
Pueraria phaseoloides
calcium uptake by 3 105
dry matter content of 3 106
phosphorous uptake by 3 105
residual effect of phosphates on 3 101–108

Raw rubber testing 3 127
Red root disease 2 93
Residual Effect of Applied Phosphates on Performance of Hevea brasiliensis *and* Pueraria phaseoloides 3 101
Resilience 3 127
Rigodoporus lignosus 2 99
Rock phosphate
residual effect of on *P. phaseoloides* 3 101–108
Root disease
description of 2 93
organisms of 2 99
RRIM 600
effect of NR-based fertiliser on 1 4, 7
RSS degradation in sunlight 3 130, 131
Rubber effluent 1 6

Semicarbazide 1 19; 2 61, 81, 87, 88
Skim rubber 1 6
SMR crate
cooling rate of SMR in 1 21
SMR production 1 25
Sodium orthophenylphenate 2 77
Sodium pentachlorophenate 2 76
Soils
'bris' 1 7
Holyrood 1 3
phosphate fractions in 3 102, 103, 104
phosphorous distribution in 3 101
presence of iron and aluminium 3 101
Rengam 1 3
sandy 1 1, 7
Soil series
Rengam 3 101
Serdang 3 101
Some Factors Affecting Yield Response to Stimulation with 2-Chloroethylphosphoric Acid 1 50
Storage Behaviour of Crated Tyre Rubber : Effect of Baling Temperature and Viscosity Stabilisers 2 81

Storage hardening
effect of rubber components on 2 85
effect on Mooney viscosity 2 65
increase in viscosity 2 81
inhibition of 2 61, 81
of crated rubber 2 81–92
SMR 5CV 1 19–30
SMR 5L 1 19–30
SMR 10 1 19–30
Sunlight
effect on dynamic properties 3 127–134
Superphosphate 3 101

Tannin 3 109
Tapping
effect of time of on latex flow 1 50, 51
Tensile strength 3 127
Tetrahydrofuran 2 61
Tetramethylthiuram disulphide 2 77
Tipulids 2 76, 94, 95, 96
Turgor pressure 1 51
diurnal changes in 1 53, 54, 55
effect of repeated stimulation on 1 57
Tyre Rubber
methods for determining storage behaviour of 2 81, 82
PRI 2 87
PRI change in 2 89–92
storage behaviour of 2 81–92
viscosity inhibition in 2 87, 88
viscosity stabilisation of 2 82
Wallace Plasticity 2 87
Wallace Plasticity change in 2 89–92

Vacuoles 3 120
Viscosity
stabilisation of in Tyre Rubber 2 82, 83
stabilisation with formaldehyde 2 86
stabilisation with hydroxylamine 2 83
Viscosity of natural rubber 1 19
Volatile fatty acids
causes for increase in 2 69
changes in level of 2 70

Wallace plasticity
effect of baling temperature on SMR 5CV 1 28
of SMR 5L on storage 1 22
of SMR 10 on storage 1 24

Yield production
diurnal fluctuations on 1 51
factors affecting 1 50
site effect of ethephon application 1 54, 55, 56, 59
Yield stimulation
and high plugging index 1 50
effect of repeated yield stimulation on turgor pressure 1 57
effect on ion distribution 1 37, 45, 47
with 2-chloroethyl phosphoric acid 1 50–60

Zinc oxide 2 77

2-Chloroethyl phosphoric acid
as yield stimulant 1 50–60
2,4-dichlorophenoxyacetic acid 1 51
2,4-dinitrophenylhydrazone
concentration of 2 63
5,5-dimethyl-1,3-cyclohexanedione 2 61

Printed by Rajiv Printers, 73, Jalan Ampang, Kuala Lumpur.
